

# No Roof Bows

ONE-PIECE VAULTED  
COMPOSITE ROOF PANEL

# SolarX VCR

## NO ROOF BOWS

SolarX VCR is a single piece vaulted composite roof panel with a smooth, snag free interior eliminating the risk for roof or freight damage. Ridge high strength glass fiber reinforced skins, paired with a structural foam core provides strength and stiffness without the need of roof bows.

The interior skin provides exceptional puncture strength, far exceeding traditional roof materials.

Top Photo: Bright interior even with the door shut.  
Bottom Photo: Zero visibility with the door shut and an aluminum roof.

Ridge Corporation is committed to the design and manufacturing of eco-friendly products that provide long term value today for a sustainable tomorrow.

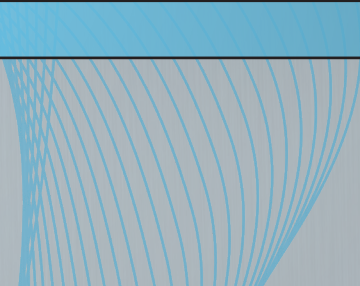

Dymondply scuff is RESILIENT and employs BIOSTAT™ so that you can haul anything you want.....Food Safe.

With UV protection throughout, SolarX VCR provides a bright interior that will withstand the tests of time. The translucent SolarX VCR provides day and night transmissible light which improves safety and reduces freight damage at your dock.

SolarX VCR meets AAR M-931 standards for load deflection requirements. Non-translucent version also available.
