

DYMOND PLY
POLYESTER FIBER

Turn On The Light!

TRANSLUCENCE THAT LASTS

SolarX

THE NEW STANDARD

SolarX™ combined with Dymondply linings and scuff, give you a resilient, reflective interior. RoyalWatson™ white surface provides additional protection with Bio-Stat™ technology prohibiting bacterial and fungal growth.

SolarX with Surlok™ provides a superior bonding surface using urethane-based adhesives. ALWAYS SPECIFY RIDGE PRODUCTS FOR HIGH PERFORMANCE.

Top photo: The light view with a SolarX translucent roof. Light even in the shade. Bottom photo: The dark view with an aluminum roof.

Ridge Corporation is committed to the design and manufacturing of eco-friendly products that provide long term value today for a sustainable tomorrow.

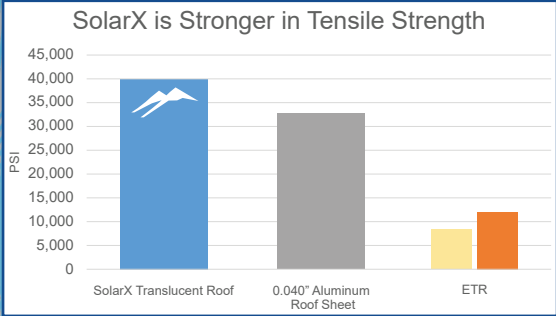

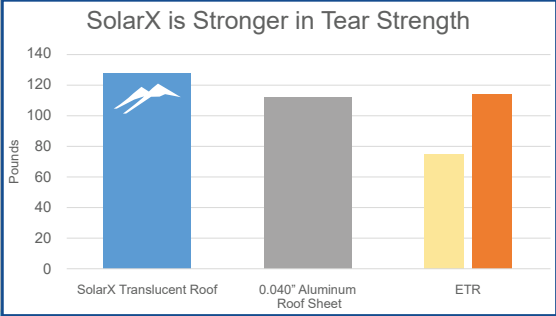

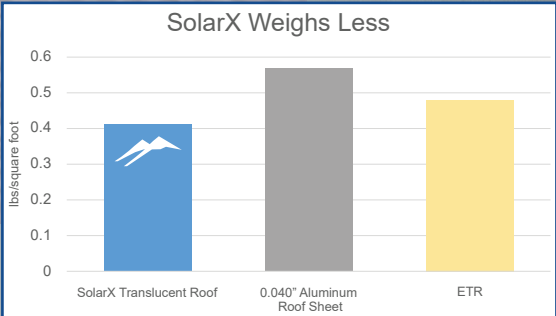

Dymondply scuff is RESILIENT and employs Bio-Stat so that you can haul anything you want.....Food Safe.

SOLARX is the new standard for translucency that lasts! Specify the resilience of SolarX in plate and sheet and post trailers/truck bodies alike.

TRANSLUCENCE THAT LASTS

SolarX resilience is stronger, lighter and better looking. SolarX maintains a white appearance longer.

DAY AND NIGHT TRANSMISSIBLE LIGHT IMPROVES SAFETY AND REDUCES FREIGHT DAMAGE AT YOUR DOCK. SOLARX IS 100% RECYCLABLE.

HELPING OTHERS REACH NEW HEIGHTS BY ADVANCING COMPOSITE SOLUTIONS

Ridge Corporation is an engineering based solutions provider
utilizing today's and tomorrow's highest quality composite
materials
